

Korelcons

PRESENTING OUR ICONS

Cap Table Management

Easily manage and update your cap table with detailed transactions, complete with documents linked to each shareholder's profile.

Portfolio Management

See a full view of all your investments in one centralized location, allowing you to access company information, investment details, documents, and more.

Shareholder Management

The all-in-one platform allows companies to easily manage shareholder communication, organize meetings, generate reports, news releases and more.

BoardRoom Management

Efficiently manage your boardroom by tracking your minute book, corporate records, calendar of board events, documents, shareholder voting, and committees in a secure, centralized location.

DealRoom Management

End-to-end management of capital raising activities for companies. Visibility on status of investors, creating deal rooms to share with groups for funding, mergers and acquisitions, etc.

Issuance Platform

An end-to-end, private label solution for managing RegA+ and RegD type investments. Complete AML, KYC, ID verification, tracking of investors, and more with an all-in-one solution.

Transfer Agent

SEC-registered* transfer agent service allows for share transfers to be managed and performed with ease and without the wait, risk, or cost.

Broker-Dealer

An all-in-one solution for broker-dealers, enabling them to perform due diligence and maintain global compliance with confidence.

Infrastructure of Trust

The first fully permissioned, highly secure blockchain infrastructure for fully compliant, worldwide digital securities.

Compliance

Facilitate compliance with securities law and corporate law across multiple jurisdictions.

KorePartner Management

As a KorePartner, serve as a trusted advisor to companies in the global private capital market while accessing new opportunities.

Secondary Market

Securities previously traded between investors.

Investors

Full investment control and investor regulatory requirements.

Private Capital Markets

Privately-held companies can sell equity to investors.

KoreChain

Permissioned blockchain built on industrial-strength Hyperledger Fabric.

KoreNodes

Blockchain nodes exclusively owned, controlled, and managed by independent, regulated KorePartners.

Companies

Transparent and fully compliant transactions for businesses.
